1. ☒ The following document has not yet been furnished:

☒ copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date in the claimed priority date.

(3) FR-A-2 718 065

1. The filter element according to claim 1 originates from document (1) as the closest prior art. The claimed filter element differs from this prior art by the characterizing features of claim 1. These features solve the problem of cleaning the magnetic separator in the filter element when the filter element is backwashed.

2. The remaining prior art does not provide any inducement for discovering these features. Document (2) does describe a backwash filter device, but this device does not have a magnetic separator. Document (3) does describe a filter element having a rod-shaped magnetic separator, and the stripper plate is cleaned with the magnetic rod, but is moved hydraulically or pneumatically with a rod assembly. Claim 1 therefore meets the requirements of PCT Article 33(2) and (3).
